## ELF to INSPIRE at Barcelona conference

Published on Tue, 2016-08-16 13:41

As a practical example of INSPIRE implementation, the European Location Framework (ELF) Project has supported the delivery of national web feature services and provided valuable feedback on the data specifications as they are implemented in different countries.

Members of the Project Consortium will be sharing their experiences, providing an update on progress and looking forward to the next steps in the ELF journey at the 2016 INSPIRE Conference in Barcelona. The conference runs from 26 to 30 September and features a packed agenda.

The ELF Project sessions take place on 29 and 30 September and include a plenary presentation, parallel sessions and a workshop. The timetable of ELF Project activities appears below.

For more information and programme details, please visit the [INSPIRE Conference 2016 website](#).

29 September 2016
