ELF Project announces 10 new partners

Published on Mon, 2016-03-14 13:19

The ELF Project is delighted to announce 10 new partners who will provide data for the European Location Framework.

The National Mapping and Cadastral Agencies join a consortium of 40 organisations from the private, public and academic sectors.

The new members are:

- Institute of Geodesy, Cartography and Remote Sensing, Hungary
- National Land Survey of Iceland
- Registers Iceland
- Ordnance Survey Ireland
- Latvian Geospatial Information Agency
- The State Land Service, Latvia
- State Enterprise Centre of Registers, Lithuania
- The National Centre of Remote Sensing and Geoinformatics (GIS-Centras), Lithuania
- Directorate General for Territory, Portugal
- Republic Geodetic Authority, Serbia

The project, which runs until October 2016, brings together 40 participating companies into a collaborative consortium that includes national & regional mapping and cadastral agencies, software developers, application providers, research & academia.
